HOW TO REPLACE THE BLADE

Detachment

1. Wrap the blade in a towel for safety.
2. Tap the handle end gently with the saw teeth facing upward to loosen the blade.
3. Pull the blade out of the spine.

Attachment

1. Insert the blade into the spine, and hook onto the pivot.
2. Squeeze the blade into the gap of the spine as a temporary lock.

Tap the handle end gently with the saw teeth facing downward to fix the blade firmly.
